

IN THE ABSTRACT

Please amend the Abstract as follows:

Please replace the original Abstract with the attached new Abstract as follows:

-- A method and apparatus for editing a moving image displayed on a display unit. In the present invention a computer graphics (CG) object in said moving image displayed on said display unit is designated and a command relating to the designated CG object is displayed on the display unit at the time of designating the CG object. Thereafter, the command relating to the CG object is executed causing an editing operation of the moving image to be conducted. --
